

## Nuka

The Nuka is the second kayaks in the arrow family and it is a smaller sibling to the Play models.

The Nuka is relatively short at 5.03 m but despite its length it has a very effortless glide. The Nuka has a speed optimized hull and soft chines, the hull is rounded for less resistance and less wet surface making the Nuka glide effortlessly through the water.

The Nuka has enough rocker to make the hull very maneuverable but without sacrificing speed. It is a very nimble kayak that has quickly become a best seller in the arrow range. The Nuka is especially popular among the female and smaller paddlers for its fit and glide. It is great for day trips or shorter overnight camping trips.

The Nuka is also a very fun play boat and it has been tested all over Scandinavia and in Wales and Scotland.
